15- SPAIN ENDS W/M <http://northeastwindmills.com/green-energy-collapsing-in-spain-as-government-support-runs-dry/>
Wind turbines are not green, they're not reliable, they don't replace any conventional power plants, they destroy the beauty of the landscape, they lower property values and they raise electric rates. There's no upside.
With massive deficits hammering their economy, [Spain can no longer afford to prop up the green industry](#), and as you would expect, the businesses used to receiving government money, are suffering, badly.

16- <http://www.antoniste.net/2013/08/06/eolien-lallemagne-aussi-se-casse-la-gueule/>

To prevent the rotors from corroding in the salty air, they have to be supplied with electricity produced with diesel generators.

L'éolien, même en Allemagne ça ne fonctionne pas ! Désormais, vous saurez quoi répondre aux gauchistes qui citent ce pays en exemple.

17- <http://www.thedailyliker.com/how-car-dealers-get-rid-of-unsold-inventory-2/?append=cpc&aff=2056&off=1530>

What could be better than buying that car you've been dreaming about at a rock-bottom low price?

18- If you want to get a bit more general background, the following post will **give you a very clear and succinct historical picture of the development of the wind industry.**

stophesethings.com/2015/02/22/three-decades-of-wind-industry-deception-a-chronology-of-a-global-conspiracy-of-silence-and-subterfuge

Also **read the timeline embedded** in the above blog:

cdn.knightlab.com/libs/timeline/latest/embed/index.html?source=0Ak2bgr7C0nhPdGR3S1IEekU3T3p4ZDhUNDdRV2Y2ZkE&font=Bevan-PotanoSans&maptype=toner&lang=en&height=650

– it contains a very succinct summary of who knew what and when in relation to the development of the wind industry – it is eye opening if you don't already know the full facts. What I outlined above is demonstrated in the timeline, which contains links to supporting documentary evidence.

19- <https://mothersagainstwinturbines.com/2016/08/02/donald-trump-tells-the-unvarnished-truth-about-renewable-energy/>

The wind industry has challenged Trump's previous statements about wildlife deaths, including his contention earlier this year that turbines kill more than a million birds a year.

The U.S. Fish and Wildlife Service estimates that wind turbines kill about 500,000 birds annually in total, much less than other bird threats like cats and buildings.

20- <http://www.windconcernsontario.ca/renewable-energy-economic-promises-fall-short-university-study/>

Key Takeaways:

Renewable energy mandates cost Wisconsin taxpayers and ratepayers nearly **half a billion dollars per year.**

Renewable energy mandates **cost Wisconsin around 10,000 jobs per year,** far more than the "clean energy" jobs created.

Losses in economic activity hover around **\$1 billion per year** as a result of renewable energy mandates.

21- http://www.masslive.com/politics/index.ssf/2016/08/massachusetts_legislature_vote_1.html

The bill, [H.4568](#), requires Massachusetts to solicit long-term contracts to procure 1,600 megawatts of offshore wind power. That figure is halfway between the 1,200 megawatts proposed by the House and the 2,000 megawatts proposed by the Senate.

The bill would also require Massachusetts to solicit long-term contracts for 1,200 megawatts of hydropower or other renewable resources, such as land-based wind or solar. **Baker has been a strong advocate for purchasing more Canadian hydropower.**

Rural Ontario 'in crisis' due to high hydro rates, local United Way head says By [Denis](#)

[Langlois](#), Sun Times, Owen Sound

23- <http://ontario-wind-resistance.org/2016/07/28/annual-wind-turbine-blade-failures-estimated-at-around-3800/>

Bellamy, co-founder of renewables advisory firm Aarufield, pointed out that **blade failures are the primary cause of insurance claims** in the US onshore market. They account for over 40% of claims, ahead of gearboxes (35%) and generators (10%).

Recent examples of blade failures include a blade from a Vestas [V90 3MW turbine](#) that snapped on a wind farm in the north of Denmark last year. At the time, Vestas said the winds were not particularly high. [Read article](#)

24- <https://mothersagainstturbines.com/2016/07/30/unmanageable/>

Scott Luft has been poring over the mounds of data produced by the Independent Electricity System Operator (IESO) and other sources for the past six years. Luft's research and analysis, compiled on his website coldair.luftonline.net, is an important resource for anyone interested in understanding what has gone so terribly wrong with Ontario's electricity market. Luft has

methodically revealed, and laid bare, the destructive politically driven management of Ontario's electricity system and shows why residents will be paying for these decisions for decades to come.
